-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 3727

1. Claims 1-3, 5, 6, 8, 9, 10, 12, 13, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sutherland (5297725) in view of either Spang (3259299) or Countee, Jr. (5074462). Sutherland teaches a carton having a plurality of panels, a displaceable portion 38 to be at least partially detached from the carton to define an opening at least partially defined by first weakened line 40, the opening defining an upper edge of the carton end when at least partially detached from the carton end, a panel portion 82 visually exposed to an exterior of the carton through the opening and detachable from the carton. Sutherland meets all claimed limitations except for the second weakened line. Either Spang or Countee teaches that it is known in the art to provide a printed panel connected to an end flap by a weakened line. It would have been obvious to one of ordinary skill in the art to have the printed panel connected to an end flap by a weakened line in Sutherland as taught by either Spang or Countee to provide an alternative means for attaching the coupon to the container.

2. Claims 7, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Sutherland rejection, as set forth in paragraph 1, and further in view of Dutcher et al. (4405078). Dutcher teaches that it is known in the art to provide a carton with a bottom comprises of two panels. It would have been obvious to one of ordinary skill in the art to provide a carton having bottom comprises of two panels as taught by Dutcher to provide the desired construction for the container.

3. Claims 1-3, 5-6, 8-10, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Evers (5160024). Sutherland teaches a carton having a plurality of panels, a displaceable portion 116 to be at least partially detached from the carton to define an opening at least partially defined by first weakened line 32, the opening defining an upper edge of the carton end when at

least partially detached from the carton end, a panel portion 52, 50 visually exposed to an exterior of the carton through the opening by at least partially detachment of the displaceable portion from the carton end and connected to a remainder of the panel portion along second weakened lines 51, 53.

Note that the bottom is portion 20, and portion 52 is connected to the end flap 20.

4. Claim 4, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spang rejection as set forth above in paragraphs 1 and 4, and further in view of Schein (6648217). It would have been obvious to one of ordinary skill in the art to provide a game piece in the printed panel to provide the desired method for promoting the product.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tri M. Mai whose telephone number is (571)272-4541. The examiner can normally be reached on 7:30am-5:00pm.
